PROJECTS

Undercut - F1 Pronostics

Full-stack web application allowing Formula 1 fans to submit race predictions, score points automatically, and compete on a leaderboard with friends across a full season. Designed and built from scratch as a monorepo (Turborepo), with a NestJS REST API, Prisma ORM, and a React frontend. Includes authentication, a friend system, seasonal rankings, and integration with the F1 calendar API. Inspired by a Discord bot previously used by a community of 30,000+ users.
